Python Programs to Print Different Patterns

By: @curious_.programmer

1] Half Pyramid of Stars (*)

```
for i in range(5):
    for j in range(i + 1):
        print("*", end="")
    print()
```

Output:

```
*
* *
* * *
* * * *
* * * * *
```

2] Full Pyramid of Stars (*)

```
for i in range(5):
    for s in range(-6,-i):
        print(" ", end = "")
    for j in range(i + 1):
        print("* ", end = " ")
    print()
```

Output:

```
        *
      *  *
    *  *  *
  *  *  *  *
*  *  *  *  *
```

@curious_.programmer

3] Inverted Half Pyramid of Stars (*)

```
for i in range(5):
    for j in range(i, 5):
        print("* ", end = "")
    print()
```

Output:

```
* * * * *
* * * *
* * *
* *
*
```

4] Inverted Full Pyramid of Stars (*)

```
for i in range(5):
    for s in range(i):
        print(" ", end = "")
    for j in range(i, 5):
        print("* ", end = " ")
    print()
```

Output:

```
* * * * *
 * * * *
  * * *
   * *
    *
```

@curious_.programmer

5] Print Pattern of Numbers

```
num = 1
for i in range(5):
    for j in range(i+1):
        print(num, end = " ")
        num = num + 1
    print()
```

Output:

```
1
2 3
4 5 6
7 8 9 10
11 12 13 14
```

6] Print Pattern 1 12 123

```
num = 1
for i in range(5):
    for j in range(i+1):
        print(num, end=" ")
        num = num + 1
    num = 1
    print()
```

Output:
```
1
1 2
1 2 3
1 2 3 4
1 2 3 4 5
```

@curious_.programmer

7] Print 12345 1234 123 12 1

```
for i in range(5):
    num = 1
    for j in range(5, i, -1):
        print(num, end=" ")
        num = num + 1
    print()
```

Output:
```
1 2 3 4 5
1 2 3 4
1 2 3
1 2
1
```

8] Inverted Half Pyramid of Numbers

```
decr = 8
for i in range(5):
    count = 0
    for k in range (decr):
        print (end = " ")
    decr = decr - 2
    for j in range (i+1):
        count = count + 1
    num = count
    for j in range (i+1):
        print (num, end = " ")
        num = num - 1
    print ()
```

Output:

@curious_.programmer

```
    1
  2 1
3 2 1
4 3 2 1
5 4 3 2 1
```

9] After 180 degree rotation:

```
def pypart2 (n):
    k = 2 * n - 2
    for i in range (0, n):
        for j in range (0, k):
            print (end = " ")
            k = k - 2
        for j in range (0, i + 1):
            print ("* ", end = " ")
        print ("\r")
n = 5
pypart2 (n)
```

Output:

@curious_.programmer

```
        *
      * *
    * * *
  * * * *
* * * * *
```

10] Numbers without reassigning

```
def contnum(n):
    num = 1
    for i in range(0, n):
        for j in range(0, i+1):
            print(num, end = "  ")
            num = num + 1
        print("\r")
n = 5
~~count~~ contnum(n)
```

@curious_.programmer

Output:

```
1
2 3
4 5 6
7 8 9 10
11 12 13 14 15
```

11] Simple Pyramid Pattern:

```
def pypart(n):
    myList = []
    for i in range(1, n+1):
        myList.append("*" * i)
    print("\n".join(myList))
n = 5
pypart(n)
```
